

Ceiling heating

System E-ENERGY CARBON FLEECE

Renovation of an office in 49191 Belm-Vehrte

In an office building in Vehrte, an existing office was renovated. At the same time the own consumption of the existing PV system was increased. A total of around 10 m² of heating foil was installed in the ceiling of a 21 m² room, which corresponds to an occupancy rate of 50%. The **E-ENERGY CARBON FLEECE** system was used.
