Heating foil E-ENERGY CARBON FLEECE

Caution: Install E-ENERGY CARBON according to the installation instructions. Only use plastic spatula to press in the heating foil. Avoid kinks and folds. After installing the heating foil, a complete covering layer (filler, plaster system, tile, etc.) of at least 2 mm must be applied. Use recommended products in accordance with the manufacturer's instructions and the generally recognised rules of technology. **TIP:** Check in the manufacturer's instructions when the heating system can be put into operation. In the case of tile coverings, this can take up to 28 days.

Wood floors		Parquet
Primer		Universal primer UZIN PE 360 PLUS
If required	Compensation	Premium levelling compound UZIN NC 170 LevelStar
	Primer on balance	–
Embedding heating foil		1. Bonding the heating foil with UZIN PE 630 / UZIN PE 650 2. Levelling on the heating foil with Premium levelling compound UZIN NC 170 LevelStar
Primer on embedded heating foil		–
Decoupling		–
